

TMCE 2000 - Table of contents

Foreword	iii
International Program Committee	v
Paper Review Panel	vi
Table of Contents	vii
Chapter 1 – Selected invited papers	1
Company Policy for Competitive Engineering After the Millennium Rollover <i>Ard van Oosten Slingeland (NL)</i>	3
Concept Design CAD for the Automotive Industry <i>Michael Tovey (UK)</i>	9
Trends in Analysis and Optimization of Products <i>Louis Komzsik (USA) and Edward Stanton (USA)</i>	19
Extending the Optimization Paradigm in Engineering Design <i>Panos Y. Papalambros (USA)</i>	29
Human Factors in Competitive Product Design and Engineering <i>William S. Green (NL)</i>	43
Knowledge Intensive Engineering Towards Sustainable Products with High Knowledge and Service Contents <i>Tetsuo Tomiyama (J)</i>	55
Manufacturing Issues in the New Millenium <i>Bernard K. K. Hon (UK)</i>	69
Chapter 2 – Knowledge processing in engineering	77
CDE – Customer driven engineering	79
Geometric Model of the Human Body <i>Niels C. C. Moes (NL)</i>	79
The Human dimension in Improved Product Introduction Processes, and the Related Implications of Technology Transfer <i>Chris M. Pearce (UK), Adam A. Bodnar (UK)</i>	93
The Consensus Machine: A Software Tool to Support Integral Design Using Business Criteria and general Design Tools as an Interface <i>Hein Reinders (NL)</i>	105
EMT Emerging modeling techniques	117
Geometric Modelling with α -Complexes <i>Bart H. M. Gerritsen (NL), Klaas van der Werff (NL) and Remco C. Veltkamp (NL)</i>	117

Vague Modeling for Conceptual Design <i>Imre Horváth (NL), Zoltán Rusák (NL), Joris S. M. Vergeest (NL)</i> <i>and György Kuczogi (NL)</i>	131
A Framework of Deficient Information Modeling for Conceptual Shape Design <i>Huilin Shu (PRC), Jihong Liu (PRC) and Ji Zhou (PRC)</i>	145
DAS - Development advising systems	157
The Assessment Tool for Global New Product Development <i>Alejandro Balbotin (UK) and Baback Yazdani (UK)</i>	157
What-If Synthesis Support Tools as a New Paradigm in CAD <i>Otto W. Salomons (NL), Michael G. R. Popma (NL) and</i> <i>Fred J. A. M. van Houten (NL)</i>	169
Product Structuring and Synthesis in Evolutionary Design <i>Vladimir Sedenkov (BE)</i>	183
On Reliability Dimension in Product Development of Mechatronic Systems <i>Toivo Tähemaa (EST) and Vello Reedik (EST)</i>	197
DMC - Data model communication	203
On Data Model Communication in Design Activities <i>Silvia Ansaldi (I) and Franca Giannini (I)</i>	203
Experiences of Distributed Product Data Management of Electro-Mechanical Products in a Multisite Organisation <i>Juha Takalo (FL), Jorma Taramaa (FL), Pekka Savolainen (FL)</i> <i>and Jari Partenen (FL)</i>	217
Advanced Database Approaches for Supporting Cooperative Product Design <i>Dieter Roller (D) and Oliver Eck (D)</i>	225
A Framework for Engineering Enterprise Agility <i>Abd Rahman Mokhtar (UK), Martin Hanneghan (UK) and</i> <i>Madjid Merabti (UK)</i>	235
KIT - Knowledge-intensive technologies	249
A Model of Synthesis from the Viewpoint of Design Knowledge Operations <i>Tetsuo Tomiyama (J), Akira Tsumaya (J), Ken P. Hew (J),</i> <i>Takashi Kiriya (J), Tamotsu Murakami (J), Takashi Washio (J),</i> <i>Hideaki Takeda (J), Yasushi Umeda (J) and Masaharu Yoshioka (J)</i>	249
Knowledge Based Engineering for Design and Manufacture of Glass Bottles <i>José Luis Acosta Córdova (MX) and Arturo Molina Gutiérrez (MX)</i>	263
Knowledge Management in Stamping Die Design and Manufacturing <i>Ciro A. Rodríguez (MX), Raymundo Solís (MX) and Hugo Martínez (MX)</i>	275
Knowledge Based Information Systems - A Key Factor for Successful Product Design <i>Rainer Brandt (D), Michael Radtke (D) and Bruno Gries (D)</i>	283

PDM – Product development methods	293
The Architecture of a Web-Enabled Integrated System for Component Durability	293
<i>Yaowu Liu (UK), Chris McMahon (UK), Dave Brown (UK), David Leal (UK), Dick Laan (NL), Michel Defourny (B) and Janardan Devlukia (UK)</i>	
Integral Product Development and Experiences of Communication in Education	305
<i>Peter A.M. van Kollenburg (NL), Herbert Veenstra (NL), Dick van Schenk Brill (NL), Harald Ihle (NL) and Krijn Kater (NL)</i>	
Virtual-Trial-Chain in a Competitive Product Design	313
<i>Kunio Fukatsu (J) and Katsumi Inoue (J)</i>	
Design Methods Supporting Regular Reflection on Design Situation	325
<i>Isabelle M. M. J. Reymen (NL) and Dieter K. Hammer (NL)</i>	
Chapter 3 – Advanced design of products	339
CSC – Computer Support of conceptualization	341
Computer Assisted Conceptual Design Tools for New Product Development	341
<i>Sam Bucolo (AUS)</i>	
Evaluation of Foundational Theories for a Shape Conceptualization System in the Framework of the Abstract Prototyping Technique	349
<i>Eliab Z. Opiyo (NL), Imre Horváth (NL) and Joris S.M. Vergeest (NL)</i>	
A General Mechanics Model for Systems of Deformable Solids	361
<i>Johan Jansson (S) and Joris S. M. Vergeest (NL)</i>	
FGP - Form giving of products	373
Towards a Specifications-to-Shape Translation Tool	373
<i>Yvon Gardan (F), Christian Minich (F), Denis Pallez (F) and Estelle Perrin (F)</i>	
Improvement of Free-Form Surfaces for Product Styling Applications	383
<i>Glen Mullineux (UK)</i>	
Free-Form Surface Copy and Paste Techniques for Shape Synthesis	395
<i>Joris S. M. Vergeest (NL), Imre Horváth (NL), Jos Jelier (NL) and Zoltán Rusák (NL)</i>	
SPD – Sustainable product development	407
The Role of Design Within a Business Context	407
<i>Anthony J. Medland (UK)</i>	
A Method for Sustainable Product Development in Small and Medium Sized Enterprises	417
<i>Sophie H. Byggeth (S), Göran Broman (S), John Holmberg (S), Ulrika Lundqvist (S) and Karl-Henrik Robèrt (S)</i>	

The Efficient Application of Virtual Team Meetings in Product Development Processes <i>Beate Bender (D), Sven Düsselmann (D) and Martien Kiesler (D)</i>	429
Empirical Diagnoses and Training in Design Departments <i>Stefan Wallmeier (D), Petra Badke-Scaub (D), Joachim Stempfle (D) and Herbert Birkhofer (D)</i>	439
PDS - Product decomposition & structuring	451
Product Variety Optimization Under Modular Architecture <i>Kikuo Fujita (J)</i>	451
Computer Aided Multi-Criteria Evaluation of Construction Structure Variants <i>Sandro Wartzack (D), Robert Adunka (D) and Harald Meerkamm (D)</i>	465
Decomposition-Based Assembly Synthesis of Structural Products: Preliminary Results <i>Kazuhiro Saitou (USA) and F. Arkin Yetis (USA)</i>	477
The Role of Virtual Sequence Simulation in the Analysis of Packaging Machines <i>Ben J. Hicks (UK), Colin Bowler (UK), Anthony J. Medland (UK) and Glen Mullineux (UK)</i>	487
CPD – Competitive product design	497
A Hybrid Systematic and Conventional Approach to Design <i>Sangarapillai Sivaloganathan (UK), Peter T. J. Andrews (UK), Martin Cross (UK) and Matthew Lawrence (UK)</i>	497
Enhancing Competitiveness by an Integrated Product and Process Model <i>Walter Eversheim (G), Iris Schulten (G) and Markus Westekemper (D)</i>	509
Modelling Machine System for Competitive Design in The Packaging Industry <i>Colin Bowler (UK), Ben J. Hicks (UK), Glenn Mullineux (UK) and Anthony J. Medland (UK)</i>	519
A Method for Robust Machine Design Applied to Arc-Welding <i>Theodore T. Allen (USA), Waraporn Ittiwattana (USA) and Mikhail Bernshteyn (USA)</i>	529
GEP – Good engineering practices	539
A Review About Structural Optimization Concerning Fatigue <i>Eckart Schnack (D) and Wolfgang Weigl (D)</i>	539
A Practical Approach to Virtual Testing in Automotive Engineering <i>Alfred T. M. Huizinga (NL), Rien A. A. van Ostaijen (NL) and Ard van Oosten Slingeland (NL)</i>	551
Prediction of the Buckling of Thermoplastic Bottle Crates <i>Jan L. Spoormaker (NL) and Ihor D. Skrypyuk (UKR)</i>	561

An Empirical Model of the Structural Characteristics of Un-ribbed Cylindrical GRP Tanks <i>Siamak Noroozi (UK), John Vinney (UK), Philip Sewell (UK) and Auday Al-Rawe (UK)</i>	571
Chapter 4 – Advanced manufacturing of products	581
BSM - Business strategies & management	583
Participation in Action Research – A Method to Improve Knowledge of Product Development and Innovation Management <i>Stig Ottosson (S) and Evastina Björk (S)</i>	583
How to Enhance Project Management Power <i>Yasuhisa Tsuda (J)</i>	593
How to Introduce Methods of Engineering Design in Industrial Use – An Approach Based on an Evaluation of Co-operation Projects Between Industry and University <i>Michael Schneider (G) and Herbert Birkhofer (D)</i>	605
PPM - Product and process models	617
An Interactive Approach to Design Decomposition <i>Anthony J. Medland (UK)</i>	617
Integrating Feature-based Part and Assembly Modelling <i>Alex Noort (NL), Geoffry F. Hoek (NL) and Willem F. Bronsvooort (NL)</i>	627
Concurrent Engineering for Complex Products and Projects <i>Matthew Ainscough (UK) and Baback Yazdani (UK)</i>	641
PMP - Physical modeling of products	655
Adaptive Slicing for Telemanufacturing <i>Emil Marais (SA), Elizabeth M. Ehlers (SA) and Debasish Dutta (USA)</i>	655
Editable Physical Models for Conceptual Design <i>Alex F. Lennings (NL), Johan J. Broek (NL), Imre Horváth (NL), Wouter Sleijffers (NL) and Bram de Smit (NL)</i>	665
The New Approach to Design of the Shaped Cutting Tool for Multi-Axis NC Machining of Sculptured Part Surface <i>Stephen P. Radzevich (USA)</i>	675
Methods for Optimal Usage of Large Sized Physical Models During Conceptual Design <i>Johan J. Broek (NL), Imre Horváth (NL), Alex F. Lennings (NL) and Bram de Smit (NL)</i>	691
IEM - Issues of enhanced manufacturing	705
Product- and Enterprise Models Integration: A Way to Improve Virtual Enterprise Efficiency <i>István Mezgár (H)</i>	705

Integration of Process Planning and Production Planning Activities in CIM Environment	717
<i>Tibor Tóth (H), Farzad Rayegani (H) and Ferenc Erdélyi (H)</i>	
Use of Measurement Data in Computer Aided Tolerance Management	731
<i>Fredrik Wandebäck (S), Per-Johan Wahlborg (S) and Rikard Söderberg (S)</i>	
CADCAM-Based Measurement Process in Supplier Companies	741
<i>Per-Johan Wahlborg (S) and Fredrick Wandebäck (S)</i>	
EQE - Effective quality engineering	753
Effective Processes for Quality Engineering	753
<i>Ken Swift (UK), Martin Raines (UK) and Julian Booker (UK)</i>	
Multi-Board Concept – A Scenario Based Approach for Supporting Product Quality and Life Cycle Oriented Design	763
<i>Tony Robotham (DK) and Morten Hertzum (DK)</i>	
Technology Based Tools and Management Techniques Used in the Greek Industries	775
<i>Kostas Galanakis (UK)</i>	
Modeling the Customer Driven Engineering Processes of an Engineering-to-Order Company from a Document Perspective	787
<i>Remko W. Helms (NL), Henk Jan Pels (NL), Rob van den Elzen (NL) and Erik Jans (NL)</i>	
STE – Special topics of engineering	799
Improving Printed Circuit Board Design through the Use of MIDAS Critiquer and Multimedia Information System in a Concurrent Engineering Environment	799
<i>Nils de Caluwe (UK), Richard Farr (UK) and Martin S. Barber (UK)</i>	
The Influence of Cold Plastic Deformation on Precision, Microhardness and Microstructure of Cylindrical Threads	811
<i>Talu Stefan (R)</i>	
A Hybrid ANN and FEA Approach for Potential Problems	821
<i>Siamak Noroozi (UK), John Vinney (UK), Guohe Xu (UK) and Guy Littlefair (UK)</i>	
The Application of Constraint Processes for the Manipulation of Human Models to Address Ergonomic Design Problems	827
<i>Johan F. M. Molenbroek (NL) and Anthony J. Medland (UK)</i>	
Author index	837
